

Srimanjary Paul n10886524 IAB207 Assessment One

Website Description

Memorable events don't just happen. They happen to be our business. Such as this website and apps will allow businesses to advertise and manage their music events, which are in high demand.

This website will also allow the user to create, view and also to book the music events.

Technology Description

The main advantages of the web application is that it didn't require any hardware system and was easily done with the coding and by using the hardware system it would have cost more . The second advantage is that the website and apps will also allow to view the events also via mobile apps.

User Story 1
